

*To mobilize the Young people.  
To mobilize ourselves for the  
Young people*

*Action plan from AAAF towards Education*

**Francis LEBOEUF, ECL**

**November 30, 2004 - AAAF / AIAA**

# *Two observations on the students engineers*

- 1) They often have no precise knowledge  
Neither of possible spheres of activities  
Nor of the variety of the functions of the engineers

➤ **Consequences : they have no precise idea of their professional project.**

- 2) **An increasingly heterogeneous population of students.**

*Why do we need specific actions towards the young people at AAAF ?*

**On the short-mid term :**

- **To promote our activities in the fields of Aero-Astronautics**

**On the long term:**

- **To develop the interest and enthusiasm for the Aero-Astronautics fields**

# *Which actions towards the young people?*

- 1. Actions of discovery of the Aero-Astro fields.**
- 2. Assistance with the construction of their personal project.**
- 3. Assistances with the specific training activities.**
- 4. Assistance with local animation.**

# *1. Actions of discovery*

- **Conferences**
- **Visits of sites/companies**
- **Meetings with engineers of the AAAF**

## *2. Assistance with the construction of the personal project of students.*

- **Tutoring**
- **Training courses**
- **Years of caesura (sabbatical)**

# *3. Assistances with the specific training activities.*

**Towards a partnership with the Grandes Ecoles / Universities**

- **Strong evolution of the training of engineers**
  - Knowledge (from theory towards know-how)
- **Need for experts and technologists**

**Which actions?**

- **Specialized courses (Web site AAAF)**
- **Assistance of student training activities (proposal of subjects, ...)**
- **AAAF contest**
- **AAAF Web site**

# 4. *Assistance with local animation*

## Chapter AAAF

- **Students + Professors / Researchers**
- **Resource of local experts**
- **Local relay of AAAF**
  
- **To increase the interest and the enthusiasm for these domains.**
